

## Job Description

<b>JOB TITLE: SENIOR PRODUCT DEVELOPMENT ENGINEER, SPINE</b>	
<b>BUSINESS DIVISION:</b> WISHBONE MEDICAL INC	<b>Status:</b> FULL-TIME
<b>DEPARTMENT NAME:</b> NEW PRODUCT DEVELOPMENT	<b>Type:</b> FULL-TIME
<b>PREPARED BY:</b> HUMAN RESOURCES	<b>DATE:</b> 1/24/2022
<b>WORK LOCATION:</b> CORP - WARSAW	<b>REPORTS TO:</b> DIRECTOR, PRODUCT DEVELOPMENT

### SUMMARY:

The position of Senior Product Development Engineer, Spine is responsible for design and development of spinal instruments and implants from concept through market introduction, and ensuring that designs meet performance specifications, regulatory, and manufacturing requirements.

### ESSENTIAL DUTIES AND RESPONSIBILITIES: *(includes the following but other duties may be assigned)*

- Plan multiple projects simultaneously. Estimate, track, and complete projects on time
- Design and develop spinal instruments and implants from concept through market introduction, ensuring that designs meet performance specifications, regulatory, and manufacturing requirements
- Generate innovative concepts for new medical device designs to satisfy clinical requirements. Lead and participate in concept generation activities, including brainstorming sessions
- Manage product development projects and ensure that tasks are completed within the planned time. Track projects to project plans. Proactively report project status to personnel
- Develop CAD models and drawings of medical instruments and implants, including component, subassembly, and top-level drawings
- Work with surgeons, marketing, and sales to define and refine design inputs, generate design concepts and prototypes independently, perform meaningful and timely design evaluations, such as tolerance analysis, FEA, simulated use testing, dry labs and wet tissue labs, and oversee generation of documentation of clinical and surgical technique observations to create meaningful design solutions
- Maintain Design History Files (DHF) per company procedures, ensuring that DHFs are accurate, complete, and well organized
- Conduct risk analysis activities and complete related forms, including risk plans, DFMEA, risk/benefit assessments, risk reports, and others, as needed, for products under development and post-production, as required
- Perform and document tolerance analysis of components and assemblies to ensure proper fit and function
- Develop prototype devices for testing and for evaluation during verification and validation phases. Work with internal and/or external resources to produce prototype device components
- Conduct and/or monitor product verification and validation testing to demonstrate product safety and efficacy. Determine which testing is required to satisfy product requirements, to investigate potential failure modes, and to otherwise address the project design inputs. Develop protocols, plan testing, and perform or monitor testing. Utilize statistical methods, as required, to plan testing and to analyze test results. Write test reports which draw conclusions from the results
- Ensure that all work satisfies the requirements of the Company's quality manual, with particular emphasis on design control
- Conduct design reviews as specified in project plans, and in accordance with company procedure

- Prepare documentation release packages, including detail drawings, bills of material, and/or procedures. Approve Document Change Orders (DCOs) and/or Engineering Change Orders (ECOs) and obtain approvals from others, as required
- Participate in Material Review Board activities. Make decisions regarding product and material discrepancies and initiate appropriate action to prevent subsequent problems or discrepancies

**QUALIFICATION REQUIREMENTS:**

- Minimum of BS in Mechanical Engineering, Biomedical Engineering, Bioengineering, Biomedical Engineering Technology, or related field
- CAD experience with Siemens NX, preferred
- 5-7 years’ experience in a related field

**OTHER SKILLS and ABILITIES:**

- Flexibility in dealing with more than one project at a time
- Ability to meet deadlines, dependable, and self-directed
- Capable of working in fast-paced team environment
- Excellent oral and written communication skills

**PHYSICAL DEMANDS:**

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodation may be made to enable individuals with disabilities to perform the essential functions.

While performing the duties of this job, the employee is regularly required to sit and talk or hear. The employee frequently is required to stand; walk; and use hands to handle, or feel objects, tools, or controls. The employee is occasionally required to reach with hands and arms. The employee must occasionally lift and/or move up to 20 pounds.

**WORK ENVIRONMENT:**

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Associate will normally work in an office environment but may also be subject to high noise levels from machines, and physical hazards from moving machine parts. WHEN OVERTIME IS SCHEDULED, IT IS MANDATORY.
